

Stian KLASBU

Full Stack Software Developer
Oslo

Full stack developer based in Oslo with a passion for creating things. A curious person who loves to learn, create and improve technology. Previously studied technology as a social science student, but have changed to a more hands on approach to follow my dream to become a developer.

Take a look at my website for more on my projects.

<> Projects

Iver

Worked in a team of two designers (Travers AS) and two developers to create a web app enabling citizens to give direct feedback to their local government.

<https://github.com/mountwebs/iver>

Portfolio and blog

Webpage created with Gatsby (with React and GraphQL).

<https://stiangk.netlify.app/>

PhysIO

Prototype app for physiotherapists and their clients. Created with React frontend and REST API Backend with Express and MongoDB. The app provides the physiotherapist with an easier way to share exercises and sessions with their clients. Created with my mob at Salt at a 2-week sprint.
